Sensory Play

This bag contains colored rice (colored with food coloring and vinegar), plastic fish, a wooden Ark, and two wooden scoops.
You will need a shallow container or bowl to pour the rice into for play.

Sensory play supports brain development, creative expression, and soothing, entertaining fun for both kids and adults. Simply put the contents of the bag into the bowl or container and let your child(ren) play. Feel free to join in and listen as your child creates and wonders. You can add items from home for other pieces of the story. There is no objective, just play. This is a great activity during conversations about the month's curriculum or as a review of the story.
